

Tranman Document & Image Storage

Quickly and easily manage all your fleet documents and images

The Tranman Document & Image Storage solution provides a fast and simple way to view and store any fleet related images and documents against every database record in Tranman.

How does it work?

Images and documents such as MOT certificates or photographs of accident damage can be accessed quickly by any member of the department and can be included in your web portals for viewing by customers or suppliers.

The solution allows you to become paperless, save space on shared folders, and gives you peace of mind knowing images will be backed up automatically along with the system back up.
