

ANPR Web Alerts

Maximising the return on your ANPR investment

Since the mid nineties ANPR systems have been rapidly deployed as a quick and effective method of monitoring multiple lanes of high-speed traffic to tackle crime and improve operational efficiencies. Traditionally, police officers in ANPR equipped vehicles or via a desktop have been the only ones able to access and use this data.

Civica ANPR Web Alerts is the latest addition in a series of intelligence-led solutions from Civica's ANPR portfolio that transforms data accessibility and usability. Civica ANPR Web Alerts includes a selection of data sharing and analytical applications that enable an increasing number of police officers and operational teams to check each number plate captured against a series of databases. Forces benefit from improved operational effectiveness and a higher return on their ANPR investment.

Civica's ANPR Web Alerts solution enables all Police officers with a web enabled device to access and use all ANPR data. The application works with any existing ANPR systems, providing they comply with National ACPO ANPR Standards and interface with BOF2.

The latest suite of Civica ANPR software applications are listed below:

- > **ANPR Web Alerts Server.** Easy to use and configurable to specific cameras and databases, the ANPR Web Alerts Server enables real-time access to ANPR alerts via any device that includes a web browser application.
- > **Real Time Convoy Analysis.** The Real Time Convoy Analysis application collates real-time data to facilitate the effective protection of convoys, whether that be VIP's, high value loads, surveillance teams, or the identification of associated crime related vehicles.
- > **eMail and BlackBerry Alerts.** eMail and BlackBerry Alerts can be sent to police officers anytime, anywhere so they can respond accordingly.

The Benefits

Civica ANPR Web Alerts:

- > Provides officers and vehicles with mobile data terminals with increased access to real-time information, enabling forces to increase the return on their ANPR investment.
- > Improves crime clear-up rates by providing officers with the data they need to stop potential offenders during a crime. Court appearances are consequently more effective, take less time and therefore cost less.
- > Ensures officers can access ANPR data from any device with an Internet Explorer application.
- > Provides officers with focused, location specific ANPR data, eliminating the requirement for additional communications room support.
- > Is fully configurable in relation to an officer's function and role.

West Yorkshire Police

With one of the largest ANPR infrastructures in the country, West Yorkshire Police generates in the region of one million reads per day. The system provides user, operation or location specific information as well as ensuring that important hits from national databases such as the PNC are not missed. Civica's ANPR framework agreement with the force, which runs until 2015 has more recently involved the deployment of Civica Web Alerts to provide authorised users who intercept vehicles or deploy resources to intercept. The new alert client can be set up for specific roles (despatch room or mobile officers) and locations. Users have the ability to select individual or groups of cameras which can be saved to user accounts for future use as well as the ability to access individual databases.

West Yorkshire Police also make use of the Blackberry functionality so officers can access force systems and information whilst on patrol. This is especially beneficial for specialist teams and patrol officers working in high risk areas.

"Through the User Group, West Yorkshire continues to invest in, and work with, Civica to develop the solution and ensure it meets the forces' ongoing requirements. The alert client has been well received by all users and is proving to be real value for money. Indeed, we have been successfully working with Civica for the last 5 years to enhance the ANPR system to improve ANPR as a policing tool and ensure it is used effectively, whilst retaining the integrity and contributing to the overall safety of the communities we serve."

Robert Furness Force ANPR Manager West Yorkshire Police
