

Civica Libraries & Learning

Civica Library and Learning is one of the leading technology-based partners for the global library sector. Our core library management system is one of the top solutions of its kind.

As well as receiving all the benefits of a modern library management system, Civica customers will experience a much more integrated and flexible delivery, while enjoying an improved service delivery, cost savings and increased efficiencies. Each module is easily configured to meet all of your library's key requirements.

The Civica Difference

Support Extending Beyond Management Software

Library services are facing the unprecedented challenge of severe budgetary cuts while meeting heightened user service expectations in the digital age. We are therefore creating innovative and viable environments that engage and nurture a lifetime of learning. This includes helping our customers to adopt new and exciting approaches to help them achieve more, while spending less and assist in securing their longer-term future.

Hosting Services

Managed Services // Flexible

Civica's cloud-based and IT managed services mean we can manage key systems and infrastructures so our customers don't have to. While customers retain control of their operations, we provide the means to ensure critical or budget-constrained services are available, achieving value for money and delivering financial and service benefits.

Shared Service

Consortium model // Outsourcing // Bibliographic Services/back office

Civica provides a fully consortium ready suite of systems combined with expertise in helping customers to define and deliver a single system in a consortium environment.

Providing a tailored outsource of your library operations we can help you achieve value for money and ensure that critical or cost effective services/resources are available.

Technology Enabled Transformation

Flexible Service Delivery

Enabling the libraries use of cost effective technologies to deliver back and front office services more efficiently, while allowing customers to use BYOD technologies to engage with their library service on a more personal level.

Community Engagement

Integrate with other services // Helping libraries to become the heart of the community

By working with other local government departments and agencies the library can deliver a broader integrated range of services to enhance community engagement.

We understand how to deliver more by integrating other non-library systems to improve the services on offer.

“ The IT services provided by Civica will not only benefit current library members within the local community but will also encourage a wider range of users to utilise our Library services. People who previously didn't have time to the use their local library due to their busy work schedules will be able to use our resources in a more convenient and timely way that suits their needs.
